Owner, Andrea Christensen

Is your bath tub impossible to clean? Is your sink sporting some unsightly chips? Do you want those bathroom or kitchen tiles to shimmer again without having to replace them?

If so, Andrea Christensen of Quick & New Refinishing says she has the solution for revitalizing the look of your home, business or apartment complex while saving you money for bigger and better things. Customers can experience an updated look in their kitchen or bath and realize savings while avoiding the mess and expense of tearing out the old and installing the new, she adds.

Using an ISO-free acrylic finish that is safer for the environment, Quick & New Refinishing will resurface porcelain or fiberglass finishes on wall tiles, kitchen countertops, sinks, tubs, showers, cabinets and even appliances in both residential and commercial settings. They have even started working on meat coolers and swimming pools. "When we're done it's virtually new," says Andrea, a former regional manager who supervised 30 employees and oversaw 18 commercial properties in the Midwest before starting her own business nearly three years ago. With nine years of experience in the apartment industry overseeing rehabilitation projects

like the ones she now helps complete, Andrea knows what commercial property owners are looking for when it comes to remodeling results. "They want the best return for their money on their investment," she explains.

Bath tub resurfacing jobs start at \$249, which is about half the price of replacing a tub. Andrea says, Quick & New Refinishing claims that refinishing is 70% more cost-effective than replacing your current tub. It's quick, too. Andrea says her crew can do four to five resurfacing jobs a day. Andrea says she went through the resurfacing training so she knows what is involved, but she sticks to scheduling the work, marketing her business and following up with customers to make sure they are satisfied. Her three full-time employees take on resurfacing jobs in homes, hotels and apartments in Lincoln and beyond. They've even done work at apartment communities in Manhattan, Kansas.

Customers who meet Andrea are usually a bit curious when she shows up to bid a job. They sometimes ask if she does the work herself. "It's kind of a shock to them," Andrea says. "Being a woman in this business is almost unheard of. Getting started, getting your name out there is probably the hardest thing," she goes on to say. Starting her own business has been worth it though, she adds, and is a good match with her dominant personality. Andrea likes being in charge and being able to support herself, and owning her own business has made that possible. Andrea admits that it can be hard to work from her home-based office at times. "Sometimes I could find 1,000 other things to do (than work)." A typical day for her includes bidding jobs, answering calls, scheduling her employees, placing advertisements on the radio and in print media and following up with customers.

Despite the occasional distraction, Andrea believes her independent spirit, hard work and self-discipline have helped her to be successful as a business owner. "It's still way more self-fulfilling than making money for someone else," she says. "Being a business owner is very challenging, but it is very flexible. The only thing that can make you or break you is yourself." Homeowners and commercial property owners interested in having countertops, tubs, showers and tile revitalized can call Quick & New Refinishing at 432-3535 or send an e-mail to [andrea@quicknewrefinishing.com](mailto:andrea@quicknewrefinishing.com). For "before" and "after" photographs of tub, shower and bathroom refinishes completed by Quick & New Refinishing, visit the website at [quicknewrefinishing.com](http://quicknewrefinishing.com).

## Don't Replace it, Refinish it!

*Revitalize your bath or kitchen with a new finish.*

Restoring your bathroom or kitchen can revitalize the look of your home without spending as much as you would if you replaced them.

**Bath Tubs**  
**Showers Sinks**  
**Tiles Porcelain**  
**Fiberglass**  
**Cast Iron Chip**  
**Repair**  
**Kitchen Tops**

Refinishing is an outstanding alternative to replacement. Not only is it 70% more cost effective, it adds years to the life of most kitchen and bath surfaces, while providing unlimited color and decorating options.

\*\*Also look for us on Facebook!

**Friends and Family Referral:** Quick and New Refinishing is very thankful when we receive referrals. As a reward to our customers, we offer a \$20 Visa card when we book a job for somebody that you have referred. Tell your neighbors, co-workers, friends, and family to mention your name when booking a job and as soon as their job is completed we'll get the gift card in the mail for you.

*We love our refinished claw foot bathtubs, they look amazing and everyone we worked with were very friendly and got things done quickly!*

Pixi Chix Boutique and Commercial Rentals  
Lincoln, NE*

## Frequently Asked Questions:

### Q. What surfaces can be refinished?

A. Resurfacing procedures are designed for most bathroom tubs including porcelain, fiberglass, or cast iron. The same process can be used on wall and floor tiles and all types of countertops including tile, laminate, or cultured marble for baths or kitchens.

### Q. How long will it take?

A. One of the key benefits of refinishing is that it can usually be completed in less than one day. Our refinished bathtubs can be used in 24 hours and are fully cured in 48 hours.

### Q. How do I clean and maintain my refinished fixture?

A. We recommend Miracle Cleaner, a specialized cleaner made for refinished fixtures. This strong but non-abrasive cleaner will safely keep your fixture clean without dulling the gloss like an abrasive cleaner will do.

### Q. Why Refinish?

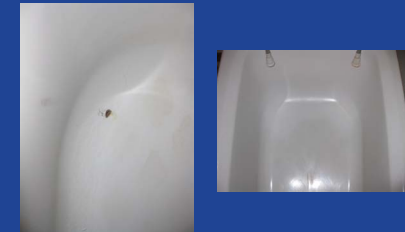

A. The #1 reason you should consider refinishing is the money that you will save. The total cost of replacing can be up to \$3000 when you consider the costs of removal, disposal, cost of the replacement tub, plumbing and faucets, flooring, carpentry, etc. Bath "liners" can be costly too, as much as \$2000! The cost of refinishing is normally under \$275. If the color is wrong on your tub or tile, this can be changed in one short day. Bathtubs that are stained or hard to clean will look virtually new after refinishing.

**5-Year Warranty** - Quick & New Refinishing offers a 5-year warranty against peeling or other failure of adhesion for bath tubs, wall tile, and fiberglass fixtures. With reasonable care, the finish should last 10-15 years before seeing any measurable wear.

*When I looked at the tub/surround of a recently-vacated rental house, I was dismayed at its condition. It had stains that could not be cleaned off and was generally unattractive. I really didn't think I could rent the house without replacing the tub unit, at least until I saw a reference to [quicknewrefinishing.com](http://quicknewrefinishing.com) on a yard sign. I went to the website and downloaded the brochures for review.*

*I decided to take a chance, so had one of their staff out to give me a bid. The work was performed and I was totally amazed at the transformation. I had them refinish the tub/surround, the bathroom sink, and the kitchen sink (both because of dings and pits). All three look completely brand new, for a fraction of the cost of replacement. I think this service is a must for rental owners and owners of older homes. There's no easier and cheaper way to get a great new look for tubs and sinks. You have to see it to believe it.*

Lincoln, NE*

(chip before and after pic)

**Chip Repair** - Fixtures are often damaged during shipping, installation, or sometimes as a result of a heavy or sharp object accidentally being dropped on the surface. This kind of repair is quick, easy and inexpensive!

**Hotels and Apartment Communities** - Quick & New Refinishing has helped out many companies throughout Kansas and Nebraska. Most often, tubs are worn and dull after years of using abrasive cleaners. We come in when it is convenient for your company or resident to solve the problem. The tub will be ready to use the very next day so it will not disrupt your booking schedule.

**Slip Resistant** - Often times Hotel and Apartment owners ask for a slip resistant bottom to reduce the liability of their residents/customers falling on a slippery surface. The non-slip product is applied to the bottom of the tub before refinishing and the tub will be ready for use the next day!
